GSEA GO BP (top 8 per direction)
positive regulation of mRNA metabolic process
positive regulation of mRNA catabolic process
mRNA destabilization
NLS−bearing protein import into nucleus
RNA destabilization
regulation of chromosome organization
mRNA processing
stress granule assembly
Higher in STK39−high
complement receptor mediated signaling pathway
negative regulation of tumor necrosis factor superfamily ...
hypersensitivity
regulation of inflammatory response to antigenic stimulus
negative regulation of tumor necrosis factor production
acute inflammatory response to antigenic stimulus
negative regulation of cytokine production involved in im...
phagocytosis, recognition
Higher in STK39−low
