GSEA KEGG (top 8 per direction)
Nucleocytoplasmic transport
Protein processing in endoplasmic reticulum
Cell cycle
mRNA surveillance pathway
RNA degradation
Spliceosome
Ubiquitin mediated proteolysis
Oocyte meiosis
Higher in STK39−high
Hematopoietic cell lineage
Rheumatoid arthritis
Malaria
Autoimmune thyroid disease
Viral protein interaction with cytokine and cytokine rece...
Asthma
Neuroactive ligand−receptor interaction
Staphylococcus aureus infection
Higher in STK39−low
